

QUESTION 1

“Zimbabwe saw a significant improvement in the quality of life in several dimensions in the 2010s. Yet, the food poverty rate increased steadily in the 2010s. As poverty increased so did inequality, with Gini index rising from 42 in 2011 to 50 in 2019. Thus, many Zimbabweans not only saw their living standards deteriorate over the decade, but they also witnessed the gulf between poorer and richer in the population widen”

Provide a detailed analysis of effective strategies that can be adopted by Zimbabwe to lessen severe poverty and inequality.

QUESTION 2

Provide a detailed critique of Zimbabwe’s model of Social Welfare, elaborate more with examples.

QUESTION 3

Explore the social problems associated with urbanisation in contemporary Africa and suggest possible strategies of addressing these problems.

QUESTION 4

The overarching goal of the NDS1 (2021-2025) is to ensure high, accelerated, inclusive and sustainable economic growth as well as socio-economic transformation and development as we move towards an upper middle-income society by 2030.

Evaluate the effectiveness of the National Development Strategy 1 (2021-2025) as a vehicle for Social Development in Zimbabwe.

QUESTION 5

Assess the implication of the Dependency Theory on the development of African countries
